Subject: Fracking regulations

Thank you for taking comments on tracking regulations. I am one of many residents concerned about preserving our water quality and good health. Please consider rules that will:
require before-and-after monitoring around each well within a half-mile of fresh water require full disclosure of where and when tracking will be used not allow trade secret exemptions that make it difficult for the public to have tracking information provide landowners information in order to allow them to secure their water rights before company action is taken provide broad public access of information about proposed tracking projects and their effects on residents

Thank you,
Cheryl Lovegreen
