

End User Survey Web Access Reviews

Site Pages to be included:

Reviewer Name:

Computer or Devices used for review:

What type of internet connection are you using:

Software names and versions (include any software used during the review, both browsers and any assistive technology used):

Describe your navigation methods (links list, headers, find, sitemap, etc.). Indicate how effective they were and if it was necessary to use a variety to accomplish goals and which ones presented barriers:

Describe the navigation used on this site (was it organized well between sub-pages to allow flexible movement back and forth through the site, links labeled well, etc.):

If forms or any other interactive elements were present please describe how accessible they were:

Describe based on your impressions what the overall purpose(s) of this web site is for (what reasons would you or another person have for using this site):

Based on your previous answer do you think the layout and organization of the site works towards the goal of using the site for its perceived purpose:

Describe any specific errors with assistive technology the site presents (elements not labeled, etc.):

If you are using audio output please describe the experience (for example were links labeled with short names or left with really long addresses to be read out loud):

If using audio what changes (if any) could be made to labeling or other elements that could be labeled better to allow for easier/quicker audio navigation:

IF links to PDF or other media files to download were available did they appear to be accessible from a random sampling?

Describe the overall accessibility of the site (was it apparent, are there a variety of ways to interact with the site).

Was there attention to detail in accessibility like Tab orders, labels, alt text for only appropriate images:

If there were barriers that required technical support from the Center in order to accomplish this review please describe them:
