

## LANDESK SOFTWARE

---

**NON-MANDATORY FOR STATE AGENCIES**

---

**NON-MANDATORY FOR POLITICAL  
SUBDIVISIONS**

**LANDesk Software  
Contract Award 2005-9900-5654**

### **PURCHASING AUTHORITY RESTRICTION**

The following state information technology standards for hardware and software apply to all Alaska executive branch purchases:

1. Approved standard – may be purchased without further approval;
2. Approved to procure without a standard – may be procured without further approval; and
3. Pending – a standard has not been established and no procurements are allowed without an exception from the Technology Management Council (TMC).

Please reference the latest version of these standards prior to any IT procurements. Questions and requests for exemption must be submitted in writing through your department IT manager to the TMC. Departmental IT managers are designated by each department's administrative services director. Alaska IT standards are available at the following website: <http://www.state.ak.us/local/akpages/ADMIN/info/plan/>

The Division of General Services has a contract with LANDesk Software for purchasing software licenses, installation, and subscription/support services. This contract is intended to provide agencies a direct means of purchasing asset management and enterprise patch management tools that are state IT standard compliant.

To inquire about LANDesk pricing or products, or to place an order, contact LANDesk Software via the following contact information:

**LANDesk Software  
698 West 10000 South  
South Jordan, Utah 84095**
