

Instructions for FTP of the Whitepages Extract Reporting file from the State Mainframe

1. Using Windows Start Menu, Choose Run and Type: **ftp jdc1.state.ak.us** and press OK. The Windows 95 FTP command window will appear.
2. When prompted enter Mainframe User id and press enter.
3. When prompted enter Mainframe password and press enter.
4. At the FTP prompt type: **lcd c:\temp** and press enter, this will be the directory the file is saved to.
5. At the FTP prompt type: **cd 'afsn.apy.rpt.wp'** and press enter, this is the directory the file will be copied from.
6. At the next FTP prompt type: **get extract** and press enter.
7. When transfer is successful, at the FTP prompt type: **quit**.

The following output shows an example of how the session might look:

```
Connected to jdc1.state.ak.us
220-FTPSERVE IBM MVS V3R1 at JDC1.STATE.AK.US, 13:37:17 on 02/10/99
220 Connection will close if idle for more than 5 minutes.
User (jdc1.state.ak.us:(none)): apycslk
331 Send password please.
Password: *****
230 APYCSLK is logged on.
Ftp> lcd c:\temp
local directory is now C:\TEMP
ftp> cd 'afsn.apy.rpt.wp'
250 "'AFSN.APY.RPT.WP.'" is working directory name prefix.
ftp> get extract
200 Port request OK.
125 Sending data set AFSN.APY.RPT.WP.EXTRACT FIXrecfm 613
250 Transfer completed successfully.
12145635 bytes received in 15.00 seconds (809.71 kbytes/sec)
ftp> quit
```

The file will be called **extract** and will be found in your c:\temp directory. This file is in ASCII Text format and should be renamed to **extract.txt**.

The layout for this file is posted on the Division of Finance Homepage.
