Investment Objective

To provide income and capital appreciation and to replicate the returns and characteristics of the Russell 3000® Index.

How The Fund Works

The Fund invests in one or more commingled funds managed by SSgA which, in combination, are designed to replicate the returns and characteristics of the Russell 3000® Index while providing for daily liquidity for plan participants. The Index is comprised of the 3,000 largest stocks in the US market and accounts for approximately 97% of the US stock market capitalization. The Fund seeks to match the returns of the Index by investing in a portfolio that replicates the Index. Replication seeks low turnover, accurate tracking and low costs.

To provide 100% exposure to the equity market and help increase tracking accuracy, the base funds may hold a combination of S&P 500®, S&P MidCap 400®, and Russell 2000® futures. Futures help enable better tracking of Index returns and allow for greater liquidity.

Investor Profile

The Fund is appropriate for those investors with long-term investment horizons who are prepared to accept some near-term fluctuations in the value of their holdings in exchange for the potential to achieve substantial capital appreciation over the long term. Stock investments tend to be more volatile than bond or money market investments.

Fund Benchmark

The Russell 3000® Index measures the performance of the largest 3,000 US companies representing approximately 98% of the investable US equity market.

The Index is constructed to provide a comprehensive, unbiased, and stable barometer of the broad market and is completely reconstituted annually to ensure new and growing equities are reflected.
