Investment Option Detail Sheet

Alaska Balanced Trust

A trust that buys and holds a diversified mix of stocks, bonds and cash.

Fund descriptions and the fund's top ten holdings are updated approximately every 6 months. Fund return results are reported quarterly and are included with participant account statements.

For information on available investment options, please visit our Web site at www.state.ak.us/drj. Under "Programs", click on the "Defined Contribution Retirement Plan" line; then on the next page, under "Publications", click on "Investment Options". Please Note: Adobe Acrobat Reader is required to download and view Investment Option Detail Sheets. You can print a copy of any sheet directly from your Web browser; if you are unable to do so, please call DRB at 1-800-821-2251 or 465-4460 from Juneau.

Investment Objective

To provide a balanced and diversified mix of U.S. and international stocks, investment-grade bonds, federally guaranteed mortgages and money market instruments for investors with a low to average risk tolerance.

How the Fund Works

The trust is made up of securities from six market sectors: large U.S. companies, established international companies, small U.S. companies, investment-grade U.S. bonds, federally guaranteed mortgages and money market instruments. A group of senior investment managers at T. Rowe Price actively manage the trust to take advantage of market opportunities.

Investor Profile

Those with at least five years before they need their money. Such investors should be prepared to accept some ups and downs in the trust's share price value in exchange for potentially higher returns over the long term.

Trust Benchmark

The trust benchmark is a weighted average of the S&P 500 Index, the Russell 2500 Index, the MSCI EAFE Index, the Lehman Brothers Government/Credit Bond Index, the Lehman Brothers GNMA Index and 90-day Treasury bills.²

Trust Management

T. Rowe Price manages the Alaska Balanced Trust. T. Rowe Price, founded in 1937, is a leading investment manager in the United States. The T. Rowe Price family of Companies has \$292 billion in assets under management.

The trust is designed to provide investors with a simple way to hold a widely diversified portfolio. Professional money managers shift assets gradually between asset classes to take advantage of market conditions.

Since these classes respond to different market forces, one class doing poorly may be offset by another class doing well. The trust's assets are spread across and within asset classes.

As with any investment, the market value of this trust may go up and down over the short term. Investors should be prepared to accept year-to-year changes in returns, including declining values. Historical returns, however, demonstrate that a long-term investment across varying asset classes may provide substantial protection against below-average returns in one class while potentially providing income and capital appreciation from classes not often included in a retirement portfolio.

¹ The Alaska Balanced Trust is not a mutual fund. It is a common trust fund established by the T. Rowe Price Trust Company under Maryland banking law, and its units are exempt from registration under the Securities Act of 1933. Investments in the Trust are not deposits or obligations of, or guaranteed by, the U.S. government or its agencies or the T. Rowe Price Trust Company and are subject to investment risks, including possible loss of principal.

² Government bonds and T-bills are guaranteed as to the timely payment of principal and interest if held to maturity. Fund shares are neither issued nor guaranteed by the US Government.

Information provided directly by T. Rowe Price Associates, Inc..

T. Rowe Price Associates, Inc. is registered as an investment adviser under the Investment Advisers Act of 1940.
