### Investment Objective

To provide a diversified mix of stocks, bonds and cash for long-term investors and/or investors with a moderate to high tolerance for risk. The fund is designed to gradually invest more conservatively, with an emphasis on capital preservation, as the year 2010 approaches.

### How the Fund Works

Currently the fund buys and holds a mix of domestic and international stocks (including small cap stocks), investment-grade bonds and federally guaranteed mortgages and money market instruments. The fund gradually shifts to a more conservative asset mix with an emphasis on capital preservation.

### Investor Profile

Those planning to retire or begin withdrawing money for other reasons around the year 2010 and/or investors with a moderate to high tolerance for risk.

### Fund Benchmark

Returns for the Alaska Target Date Funds cannot be directly compared to any one index. The Custom Target Benchmark consists of each underlying fund's benchmark, weighted according to the "strategic" weight as set forth in the current guidelines, based on historical rates of return of certain benchmarks as proxies for the asset classes represented in each fund. The specific benchmarks include (and for the current period are): Standard & Poor's 500 Index (28.00%), Russell 2500 Index (0.50%), MSCI Europe, Australasia, Far East (EAFE) Index (0%), Lehman Brothers Government/Credit Bond Index (42.75%), Lehman Brothers Mortgage Index (4.75%), and 90-day Treasury bills (24.00%).

The figures represent changing on a quarterly basis the asset mix in each fund to approach a predetermined allocation at each target date. The overall asset mix

becomes more conservative (i.e. more heavily weighted with fixed income and money market securities) as the target date approaches.

### Fund Management

T. Rowe Price manages the Alaska Target 2010 Fund. T. Rowe Price, founded in 1937, is a leading investment manager in the United States. The T. Rowe Price family of companies has over \$292 billion in assets under management.

The fund is designed to provide investors with a simple way to hold a diversified portfolio, which gradually becomes more conservative as the year 2010 draws near. Professional money managers shift assets gradually between asset classes to take advantage of market conditions.

Since these classes respond to different market forces, one class doing poorly may be offset by another class doing well. The fund's assets are spread across and within asset classes.

As with any investment, the market value of this fund may go up and down over the short term. Investors should be prepared to accept year-to-year changes in returns, including declining values. Historical returns, however, demonstrate that a long-term investment across varying asset classes may provide substantial protection against below-average returns in one class while potentially providing income and capital appreciation from classes not often included in a retirement portfolio.

*Registration with the Securities and Exchange Commission is not required for the Alaska Supplemental Annuity Plan.*

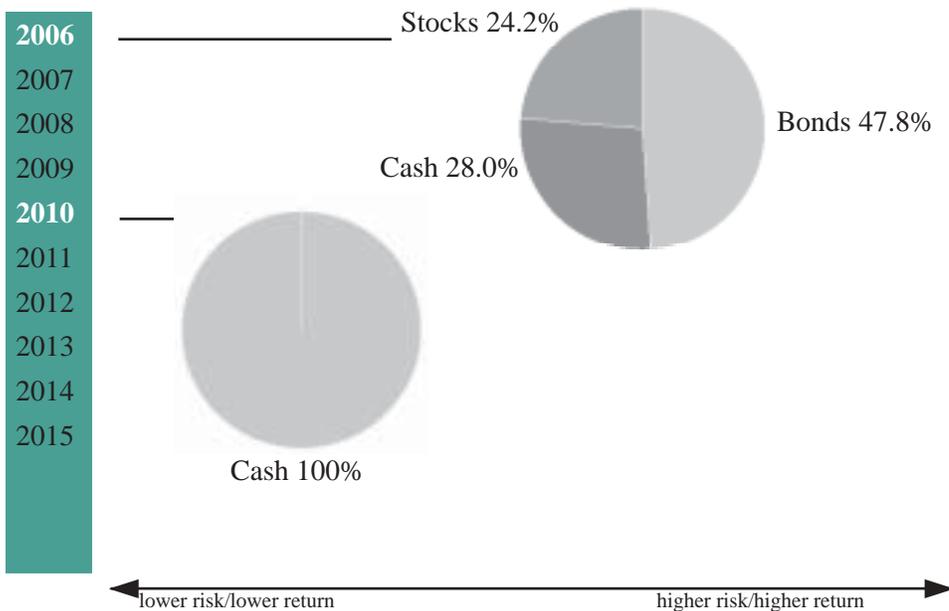

*Past performance is never a guarantee of future results.*

*T. Rowe Price Associates, Inc. is registered as an investment adviser under the Investment Advisers Act of 1940.*

*For more information about the risks of investing, please read your "Plan Information" booklet.*

**IMPORTANT NOTE:** Whenever you initiate a trade, there is a possibility the fund company may reject or delay your trade due to a number of circumstances due to extreme market conditions. If a trade is rejected, then the dollar amount will be reinvested in the original fund at the next calculated unit/net asset value after the trade is rejected. This can cause a gain or loss to your account, when units/shares are repurchased on a different day.
