Information Technology Policy
Metadirectory & Use of MIIS

Title:	State of Alaska Information Technology Policy – Metadirectory & Use of MIIS
Supersedes:	Original
Date Effective:	January 9, 2008
Status:	Approved, Technology Management Council
Version	1.0
Author:	Technology Management Council
Applies to:	This policy shall apply to requests for use of MIIS emanating from any state agency.
Scope:	Enterprise
Purpose:	To document the statewide policy governing a metadirectory standard and use of MIIS.

State of Alaska Metadirectory & Use of MIIS

Policy

A Metadirectory standard has not been selected. Use of MIIS was conditionally approved by the Technology Management Council (TMC) in August 2006, when Enterprise Technology Services (ETS) submitted a waiver request to use MIIS for identity integration between LDAP and Active Directory. The temporary need is "to automate initial populating of users from LDAP to Active Directory and provision e-mail accounts for Exchange" until LDAP is retired. Any changes to this must be documented by a waiver request to the TMC.
