Subject: Fracking in AK

Dear Ms. Colombie,

Good morning.

First, I apologize if I'm addressing a male; the Cook Inlet Keeper website gave no indication of gender. If I'm correct on gender, then thanks for being a liaison with the public on this issue.

Second, the list below is indeed a copy and paste from the CIK website, which may have even copied it from The Wilderness Society, but they all make sense to me. Note they insist on complete and transparent disclosure, not elimination of fracking. In other words, the demands are reasonable, not maniacal. We all use petrochemical products and fuel, but we just want to eliminate or minimize the "collateral damage." Pretty reasonable.

Thanks for reading this opinion.

Sincerely,

Si

Byron McCord

P.O. Box 3

Seldovia 99663

- Require before-and-after water monitoring around each well that is subject to fracturing operations within a half-mile of a freshwater source.
- Require full disclosure where and when fracking fluids will be used, what toxic constituents the fracking fluids may contain, and what amounts of chemicals will be used BEFORE and AFTER fracking operations commence.
- Allow no trade secret exemptions from the requirement to disclose the constituents of fracking fluids prior to or after their use.
- Provide broad public access to fracking-related information, and not rely solely on the problematic FracFocus website to disseminate fracking fluid information to the public.

- Provide landowners adequate notice and opportunity to secure their water rights prior to the use of fracking fluids.
