### AMENDED ADMINISTRATIVE APPROVAL AREA INJECTION ORDER 2B.022

Ms. MJ Loveland  
Problem Well Supervisor  
ConocoPhillips Alaska, Inc.  
P.O. Box 100360  
Anchorage, AK 99510-0360

RE: KRU 3A-11 (PTD 1852380) Request for Administrative Approval

Dear Ms. Loveland:

In accordance with Rule 9 of Area Injection Order (AIO) 02B.000, the Alaska Oil and Gas Conservation Commission (AOGCC or Commission) granted ConocoPhillips Alaska Inc. (CPAI)'s request for administrative approval to continue water injection in the subject well. **Specific to this amendment is clarification that testing of the well shut-in equipment linked to the well's outer annulus pressure includes both the shut-down valve and the mechanical or electrical pressure detection device.**

Kuparuk River Unit (KRU) 3A-11 exhibits tubing by inner annulus communication. The Commission finds that CPAI does not intend to perform repairs at this time, deferring until location of the communication can be determined. The Commission further finds, based upon reported results of CPAI's diagnostic procedures and wellhead pressure trend plots, that KRU 3A-11 exhibits at least two competent barriers to the release of well pressure.

The recent pressure history provided by CPAI shows that the inner annulus pressure equalizes with the 2,600 psi injection pressure, which is approximately 50 percent of the production casing's minimum internal yield pressure rating. Should the well develop communication to the outer annulus, the current injection pressure would represent 70 percent of the surface casing's minimum internal yield pressure rating.

Outer annulus pressures must be monitored and engineering controls must be installed to assure ongoing integrity of the surface casing. With such in place, the Commission believes that the well's condition would not compromise overall well integrity so as to threaten human safety or the environment.

AOGCC's administrative approval to continue water injection only in KRU 3A-11 is conditioned upon the following:

1. CPAI shall record wellhead pressures and injection rate daily;
2. CPAI shall submit to the AOGCC a monthly report of well pressures, injection rates, and pressure bleeds for all annuli;
3. CPAI shall perform an MIT-IA every 2 years to the maximum anticipated injection pressure;
4. CPAI shall install, maintain and operate automatic well shut-in equipment on the well's outer annulus. The actuation pressure shall not exceed 1,000 psi. **Testing of the shut-in equipment (shut-down valve and mechanical or electrical pressure detection device) shall be performed in conjunction with production well pilots and safety valves. CPAI shall provide to the Commission the testing procedure that will be used to verify the integrity of the well shut-in equipment linked to the outer annulus pressure;**
5. CPAI shall immediately shut in the well and notify the AOGCC if there is any change in the well's mechanical condition;
6. After well shut in due to a change in the well's mechanical condition, AOGCC approval shall be required to restart injection; and
7. The MIT anniversary date is August 20, 2007.

**DONE** at Anchorage, Alaska and dated November 1, 2010.

Daniel T. Seamount, Jr.  
Chair, Commissioner

Cathy P. Foerster  
Commissioner

John K. Norman  
Commissioner

**RECONSIDERATION AND APPEAL NOTICE**

As provided in AS 31.05.080(a), within **20** days after written notice of the entry of this order or decision, or such further time as the Commission grants for good cause shown, a person affected by it may file with the Commission an application for reconsideration of the matter determined by it. If the notice was mailed, then the period of time shall be **23** days. An application for reconsideration must set out the respect in which the order or decision is believed to be erroneous.

The Commission shall grant or refuse the application for reconsideration in whole or in part within 10 days after it is filed. Failure to act on it within 10-days is a denial of reconsideration. If the Commission denies reconsideration, upon denial, this order or decision and the denial of reconsideration are **FINAL** and may be appealed to superior court. The appeal **MUST** be filed within **33** days after the date on which the Commission mails, **OR 30** days if the Commission otherwise distributes, the order or decision denying reconsideration, **UNLESS** the denial is by inaction, in which case the appeal **MUST** be filed within **40** days after the date on which the application for reconsideration was filed.

If the Commission grants an application for reconsideration, this order or decision does not become final. Rather, the order or decision on reconsideration will be the **FINAL** order or decision of the Commission, and it may be appealed to superior court. That appeal **MUST** be filed within **33** days after the date on which the Commission mails, **OR 30** days if the Commission otherwise distributes, the order or decision on reconsideration. As provided in AS 31.05.080(b), “[t]he questions reviewed on appeal are limited to the questions presented to the Commission by the application for reconsideration.”

In computing a period of time above, the date of the event or default after which the designated period begins to run is not included in the period; the last day of the period is included, unless it falls on a weekend or state holiday, in which event the period runs until 5:00 p.m. on the next day that does not fall on a weekend or state holiday.
