Re: Aurora Gas LLC, as Operator of the) Decision and Order No. 38
Lone Creek Gas Field;)
Waste Determination) June 14, 2006

ERRATA NOTICE TO DECISION AND ORDER NO. 38

Marathon Oil Company (“Marathon”), by letter dated June 1, 2006 requested the Commission clarify the role of the Kenai Gas Field monitoring station in the discovery of a no flow condition from the Lone Creek Gas Field resulting from a compression facility fire. Clarification is noted below and a corrected version of Order No. 38 is attached.

Sentence 6 of Section A (“Background”) is **replaced** with the following footnote:

¹Decision and Order No. 38 originally issued January 20, 2006 included the following statement: “A no flow condition at the Lone Creek #1 facility triggered an alarm received at the facility’s monitoring station (Kenai Gas Field), causing Aurora personnel to respond.” A letter dated June 1, 2006 from A.B. Schoffmann (Marathon) requested the Commission acknowledge that Marathon was not responsible for monitoring Aurora’s field production. In response to Marathon's request, the Commission hereby acknowledges that as part of routine pipeline dispatch practice, Marathon questioned Aurora about the loss of flow into the Marathon-operated Beluga Pipeline on January 22, 2004. Marathon did this in an effort to understand why gas delivery to the Beluga Pipeline from the Lone Creek facility was less than the flow nominated for delivery, but Marathon was not responsible for monitoring Lone Creek field production.

DONE at Anchorage, Alaska and dated June 14, 2006.

John K. Norman, Chairman
Alaska Oil and Gas Conservation Commission

Daniel T. Seamount, Jr., Commissioner
Alaska Oil and Gas Conservation Commission

Cathy P. Foerster, Commissioner
Alaska Oil and Gas Conservation Commission
