

REVISED
NOTICE OF PROPOSED CHANGES IN THE
REGULATIONS OF THE
ALASKA OIL AND GAS CONSERVATION COMMISSION

BRIEF DESCRIPTION: The Alaska Oil and Gas Conservation Commission (AOGCC) proposes changes to Title 20, Chapter 25 of the Alaska Administrative Code, with regard to hydraulic fracturing. Specifically, the AOGCC proposed to amend 20 AAC 25.280 and 20 AAC 25.990 and add a new section, 20 AAC 25.283, in order to define hydraulic fracturing, require notice to nearby owners and operators prior to commencement of hydraulic fracturing, require water sampling and analysis, require disclosure of hydraulic fracturing fluids, increase wellbore integrity and assure containment of hydraulic fracturing fluids:

The AOGCC proposes to add regulations governing hydraulic fracturing applications, operations, and reporting regulations, including requirements for:

1. notification of landowners, surface owners, and operators within one-quarter mile of the wellbore trajectory;
2. pre and post hydraulic fracturing water well water sampling and analysis;
3. chemical disclosure of hydraulic fracturing fluids;
4. wellbore integrity requirements; and
5. containment of hydraulic fracturing fluids.

The AOGCC proposes that Sundry Approvals for well workover operations shall expire 24 months after the approval date.
