Subject: Hydrofracturing Regulations

With regards to Section 5 of 20 AAC 25.253. Hydraulic Fracturing:

- “Total Petroleum Hydrocarbons” is an ambiguous term; I believe it refers to an Oil & Grease (HEM) with a Silica Gel Cleanup to remove biogenic interferences? If so, the correct term would be “Total Petroleum Hydrocarbons by Silica Gel HEM”.
- “Radium” should specify Radium 226/228, as those are the isotopes of concern.
