RE: Cancellation of Administrative Approval AIO 04E.009 (Well PBU 04-14)

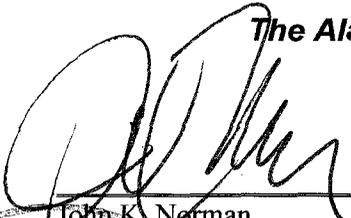

Dear Ms. Dube:

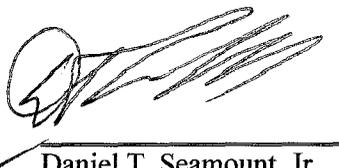

Pursuant to BP Exploration (Alaska), Inc. ("BPXA") request dated April 19, 2007, the Alaska Oil and Gas Conservation Commission ("Commission") hereby cancels Administrative Approval AIO 04E.009, which allows continued water injection. This well exhibited production casing pressure communication, and BPXA did not at the time propose repairing the well to eliminate the problem. The Commission determined that water injection could safely continue in the well, but subject to a number of restrictive conditions set out in the administrative approval.

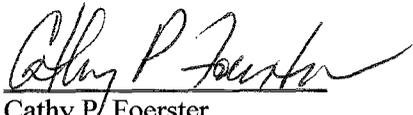

Since then, BPXA has repaired the production casing pressure communication with a rig workover and has successfully performed a passing mechanical integrity test on January 7, 2007. Consequently, Administrative Approval AIO 04E.009 no longer applies to operation of this well. Instead, injection in well PBU 04-14 will be governed by provisions of the underlying Area Injection Order No. 4E.

DONE at Anchorage, Alaska and dated May 2, 2007.
