Dear Mr. Anderson:

The Commission has determined that Rule 7 of AIO No. 9 as set forth is unclear as to the Commission's intent. Therefore, Rule 7 is amended to read:

Rule 7 Well Integrity Failure

Whenever operating pressure observations or pressure tests indicate pressure communication or leakage of any casing, tubing or packer, the operator must [IMMEDIATELY CEASE INJECTION,] notify the Commission on the first working day following the observation, [AND] obtain Commission approval [FOR CORRECTIVE ACTION] of a plan for corrective action, and when an USDW is not endangered, obtain Commission approval to continue injection.

Sincerely,

C. V. Chatterton
Chairman
